SUMMARY

I am a Full Stack Developer passionate about technology and building modern web solutions, with a focus on JavaScript, React.js, and Node.js. I have hands-on experience developing end-to-end applications, ranging from creating responsive interfaces to building REST APIs, implementing business logic, and integrating with SQL databases.

On the front-end, I work with React.js, JavaScript, HTML5, CSS3, Vite, and Styled Components to develop modern, responsive, and component-based interfaces. On the back-end, I use Node.js, Express.js, REST APIs, and SQL, working with PostgreSQL and tools like Sequelize and Prisma for data modeling, querying, and management.

I am also proficient in Docker, Git, and GitHub, and experienced in integrating front-end, back-end, and database components to build functional, organized, and scalable applications.

I am seeking a Full Stack Developer role where I can apply my skills in JavaScript, React.js, Node.js, SQL, and PostgreSQL, contribute to real-world projects, and continue my professional growth through technical challenges and continuous learning.

WORK EXPERIENCE

Front-End Developer | Freelancer | Jun 2026

Premium Restaurant: I developed a modern, responsive website using HTML5, CSS3, and JavaScript, focusing on delivering a sophisticated visual experience, showcasing the menu, and facilitating customer navigation. The result was a professional, interactive interface optimized for desktop, tablet, and mobile devices.

Front-End Developer | Freelancer | Ago 2026

E-commerce: I developed a modern, responsive e-commerce application using React.js, JavaScript, HTML5, and CSS3, featuring a product catalog, categories, search functionality, a shopping cart, and an intuitive interface. The result was a fast, organized shopping experience optimized for various devices, incorporating front-end development and UI/UX best practices.

Front-End Developer | Freelancer | Jul 2026

User API: I developed a REST API using Node.js and Express.js, integrated with MongoDB, to handle the registration and storage of new users. I implemented routes, data validation, and database persistence, creating an organized, functional backend structure ready for integration with frontend applications.

Front-End Developer | Freelancer | Ago 2026

Authentication API: I developed a REST API using Node.js, Express.js, PostgreSQL, and Sequelize, implementing user registration and login, permission management, and a distinction between administrator and non-administrator users. The project encompassed database modeling, relationship definition, and access validation, resulting in a structured, secure authentication system ready for integration with front-end applications.

SIGNIFICANT PROJECT

DevBurger — Burger Shop System: I developed a complete full-stack application for managing a burger shop, featuring customer registration and authentication, a product catalog, order management, and an administrative dashboard. The solution integrates React.js, Node.js, and PostgreSQL, delivering a modern experience for customers and organized management for administrators.

EDUCATION

Full Stack Development Training — DevClub

March 2026 – Present

Hands-on training focused on Full Stack web application development, covering HTML5, CSS3, JavaScript, React.js, Node.js, REST APIs, SQL, PostgreSQL, Git, GitHub, and Docker, involving the development of practical projects and the application of programming best practices.

KEY SKILLS

- Front-end: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, Styled Components, Responsive Design, and UI/UX.
- Back-end: Node.js, Express.js, REST APIs, authentication, user management, and front-end/back-end integration.
- Databases: SQL, PostgreSQL, MongoDB, Sequelize, Prisma, and data modeling and management.
- Tools & Technologies: Git, GitHub, Docker, npm, pnpm, and full-stack architecture development.
- Skills: Problem-solving, continuous learning, code organization, project development, and the ability to transform requirements into functional web solutions.

LANGUAGE

- English – Intermediate
- Spanish – Fluent
- Portuguese – Advanced
